

VACATION CARE SCIENCE DAYS

STREET SCIENCE has a variety of **EXCITING** and **ENTERTAINING** science themed, hands-on workshops to keep your kids engaged and excited all year long.

Our sessions are run by experienced science communicators who mix humour, exciting demonstrations and quality scientific explanations into an interactive science experience. Your students be immersed in our 'Pop Up' science lab whilst getting **HANDS-ON** to complete scientific activities in a personalised workshop on the science theme of your choice.

That's a PREMIUM SCIENCE WORKSHOP for only \$12 (+GST) * per child!

WORKSHOPS

(60 mins duration, choose 1 theme below)

We complete workshops in groups (up to 70 kids per session) to ensure that each student receives personalised instruction – see overleaf for proposed workshop itineraries catering to the size of your centre.

Slime and Snow... In our most popular workshop, your children will each undertake **2** experiments! Students makes their own tub of slime through a wonderfully weird chemical followed by piles of fluffy Instant Snow.

CO₂ Rockets... Your kids will each build a small rocket made from plastic and foam, decorate it, and then head outside to shoot their rockets around. Focused kids can get these to fly seriously high and can use their understanding of forces to modify their rockets' flight patterns. *(Best for older crowds 7yrs+)*

Polymer Worms, Balls and All... In this workshop your kids will mix chemicals to produce a range of plastic creations. These unusual polymers can be manipulated to create long stringy worms, weird rubber balls and any other shapes limited only by your students' imaginations.

Neon Coloured Super Bouncy Balls... Every wanted to experience the way materials change whilst designing and then creating your very own 'Super Bouncy Balls'? This workshop has your students making beautifully bright bouncy balls whilst learning about the properties of polymers.

PROPOSED TIMETABLE

You choose the workshop, prepare the space and our team of experienced science educators will do the rest to bring a fun **STREET SCIENCE** laboratory to your centre!

Please prepare/setup your hall or a large open area ready for our arrival. This simply needs to include an open space for the kids to sit and listen to the instructor, as well as enough trestle tables for your students to work at. We will need 2 tables for our presenter plus another table for every 10 kids to work at.

SMALL to MEDIUM CENTRES up to 70 kids

\$12.00 / child (+GST) *

MORNING SESSION		AFTERNOON SESSION	
9:00am	Staff arrive and setup	12:30pm	Staff arrive and setup
9:30 - 10:30am	Hands-On Science Workshop	1:00 - 2:00pm	Hands-On Science Workshop
10:30 - 11:00am	Staff clean up and depart	2:00 - 2:30pm	Staff clean up and depart

LARGE CENTRES over 70 kids

\$12.00 / child (+GST)*

MORNING SESSION		AFTERNOON SESSION	
9:00am	Staff arrive and setup	12:30pm	Staff arrive and setup
9:30 - 10:30am	Hands-On Science Workshop #1 (1 st half of your group)	1:00 - 2:00pm	Hands-On Science Workshop #1 (1 st half of your group)
10:30 - 10:45am	You supervise your children while we quickly clean up our chemicals and reset for the 2 nd group	2:00 - 2:15pm	You supervise your children while we quickly clean up our chemicals and reset for the 2 nd group
10:45 - 11:45am	Hands-On Science Workshop #2 (2 nd half of your group)	2:15 - 3:15pm	Hands-On Science Workshop #2 (2 nd half of your group)
11:45 - 12:15pm	Staff clean up and depart.	3:15-3:45pm	Staff clean up and depart.

*Minimum charge of \$500(+gst). Travel fees (POA) may apply.

STILL NOT SURE? Here's what our clients are saying about us!

"The kids and the staff had an absolute ball during the Street Science session today - I don't think the staff have seen the kids so enthralled and engaged in an activity all year! Everyone had so much fun either participating in, or supervising the session, and the educators have said that the program was so cool. They have all said that your staff were absolutely brilliant with the kids, and wouldn't hesitate to have your team back as part of the program another time.

Thanks so much for all your hard work in making the session today happen for our kids. I sincerely appreciate all the communication throughout the process, as it has made the whole experience completely stress-free."

Kim M (Operations Manager)

"It was awesome! The kids had a great time. Very well organised which helps with such a large group. The communication prior to the incursion was excellent which made the whole time leading up to the incursion very easy. Thanks so much!"

Shannon P (Educational Leader)

DO YOUR KIDS DESERVE AN EXTRA SPECIAL FINISH TO THE DAY?

A variety of optional extras are available to close our science day including **MODEL ROCKET LAUNCHES & MENTOS GEYSER KITS!** Kids and adults alike get fired up with a countdown then an **EXPLOSIVE** rocket launch **200m** into the sky!
Call our team to discuss which option is right for you.
