

# S<sup>Sulphur 16</sup>treet Sc<sup>Scandium 21</sup>ience

## Summer Snowing

## Materials

- Clear jar with sealed lid
- Water
- Glitter
- Baby oil or glycerin
- Small waterproof figurine or decoration
- Blu-tac

# Instructions

1. Using blu-tack (or hot glue) secure your figurine/decoration to the inside of the lid of the jar
2. Fill the jar most of the way with water and add glitter.
3. Top up with baby oil or glycerine.
4. Screw the lid onto the jar (complete with figurine) and shake to distribute the glitter.
5. Place the jar lid side down and watch as the glitter slowly sinks to the bottom (lid) of the jar.
6. The baby oil increases the viscosity of the water, making the glitter sink more slowly to the bottom.
